LVLC Leverage Leg Curl

Built with a 2" x 3" 11-gauge steel mainframe, the LVLC Leverage Leg Curl features a direct link movement arm design that enhances smooth and continuous range of motion and V-bench design provides total hamstring isolation and helps reduce back stress and unwanted knee forces. It also has an electrostatically applied metallic silver powder coat paint finish, sealed bearing pivot points and weight plate holders for storage. The LVLC Leverage Leg Curl also includes durable, double-stitched upholstery and adjustable foot rollers to accommodate all user sizes.

Weight: 145 lbs.
Dimensions: 74"L x 46"W x 26"H

Special Features

- Direct link movement arm design enhances smooth and continuous range of motion
- V-bench design provides total hamstring isolation. Helps reduce back stress and unwanted knee forces
- Adjustable foot rollers to accommodate all user sizes
- Side handles for stability and control
