LVSP Leverage Shoulder Press

Built with a 2" x 3" 11-gauge steel mainframe, the LVSP Leverage Shoulder Press features adjustable press arms with gas assisted start positions, converging press arm movement for advanced biomechanics and independent, unilateral arm action for balanced muscle development. It also has an electrostatically applied metallic silver powder coat paint finish, sealed bearing pivot points and weight plate holders for storage. The LVSP Leverage Shoulder Press is constructed with the commercial facility in mind and includes durable, double-stitched upholstery and gas assisted adjustable seat pad to accommodate all size users.

Weight: 189 lbs.
Dimensions: 51"L x 56"W x 70"H
